

Ported Mobile Subscriber Telephone Numbers exceeded 200.000

In February 2007, the mobile telephony numbers ported exceeded 200.000, over a total in excess of 300.000 fixed and mobile telephony numbers ported. In particular, the mobile telephony numbers having been ported on February 28th, 2007, amounted to **218.223** (ref. Diagram 1).

Number Portability allows all fixed and mobile telephony subscribers (including prepaid mobile subscribers, anonymous or not) to switch their fixed or mobile operator respectively, maintaining the same number; this service is now available for free by all mobile telephony operators.

Things to remember regarding the Portability Application Process:

- > Subscribers wishing to make use of the Number Portability facility shall file a special Portability application to the company to

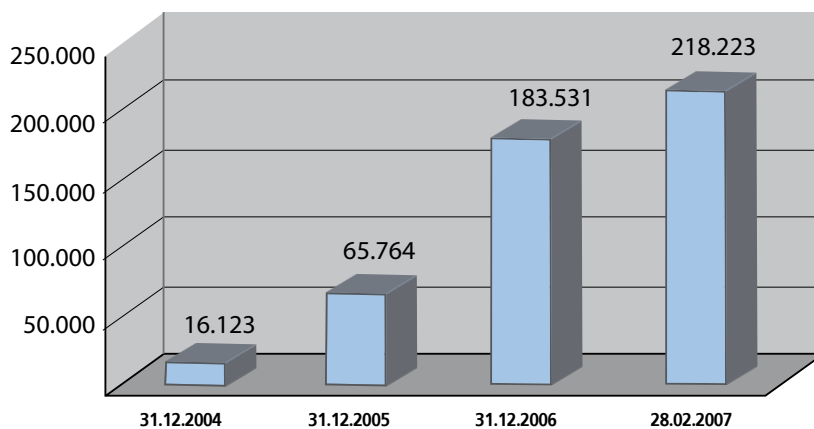

which they intend to port their number. Then, the specific company will undertake processing of the application through all the required stages to implement Portability for the specific subscriber.

- > It must be pointed out that anonymous pre-paid phone holders may also make use of Portability. A prerequisite for this is that

they designate on application the number to be ported and the code number stamped on their SIM card.

Further information regarding the method of providing the Portability facility is available at EETT website ([www.eett.gr/Electronic Communication/Telecommunications/Numbering/Number Portability](http://www.eett.gr/Electronic%20Communication/Telecommunications/Numbering/Number%20Portability)).
