

# **The proposed European Electronic Communications Code**

**EETT Conference 8 June 2017**  
Mr Vesa Terävä, Head of Unit, DG  
Connect

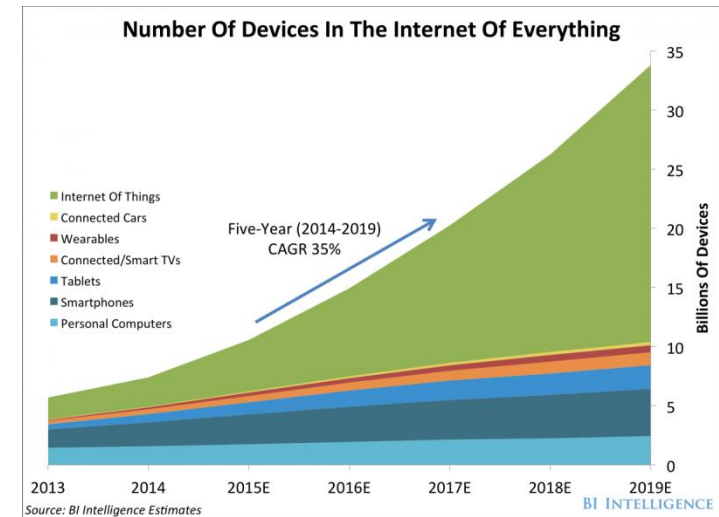

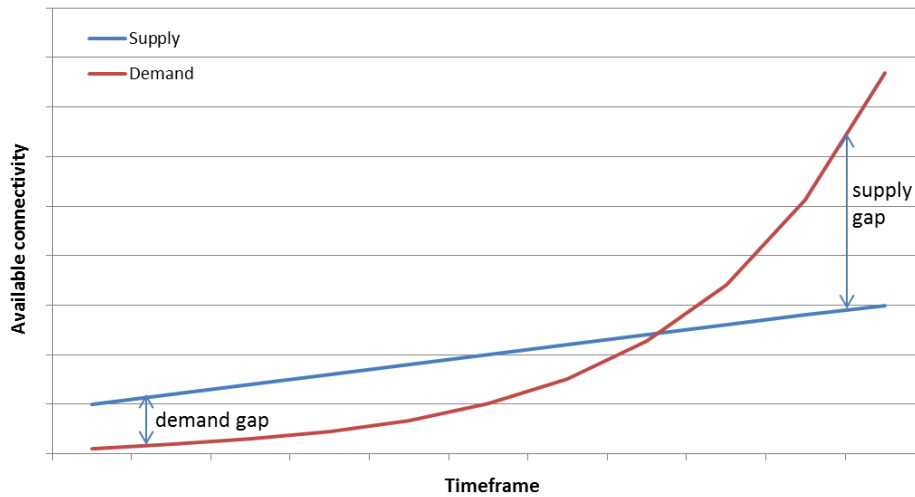

## Network access regulation

## Sustainability in the development of **very high capacity networks**

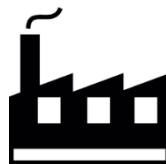

## Infrastructure decisions today need to be calibrated for demand and quality in 2025+....

... and supply faces constraints:

Access to long term financing

Production capabilities

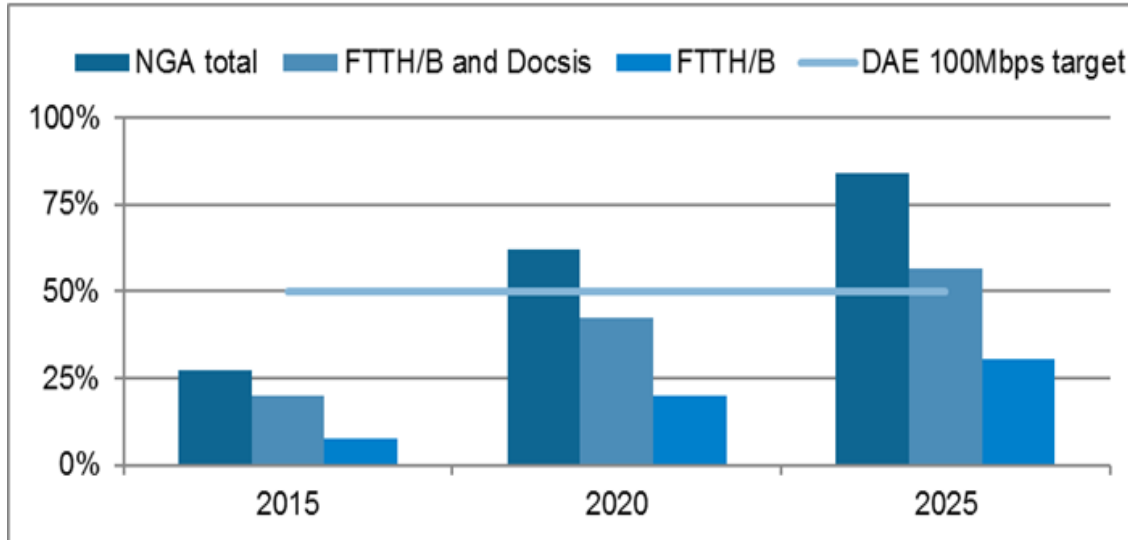

Availability of equipment

Time of skilled personnel

- NGA coverage rates range from nearly 100% to <40%
- Gaps between rural areas and average NGA coverage (40pp)
- Less performant FTTC technology in several countries risks missing DAE target of 50% take-up 100Mbit/s by 2020

## EU-wide NGA take-up

**Ensure most advanced connectivity  
for all citizens and EU economy**

**Create an investment-friendly  
environment to support 5G**

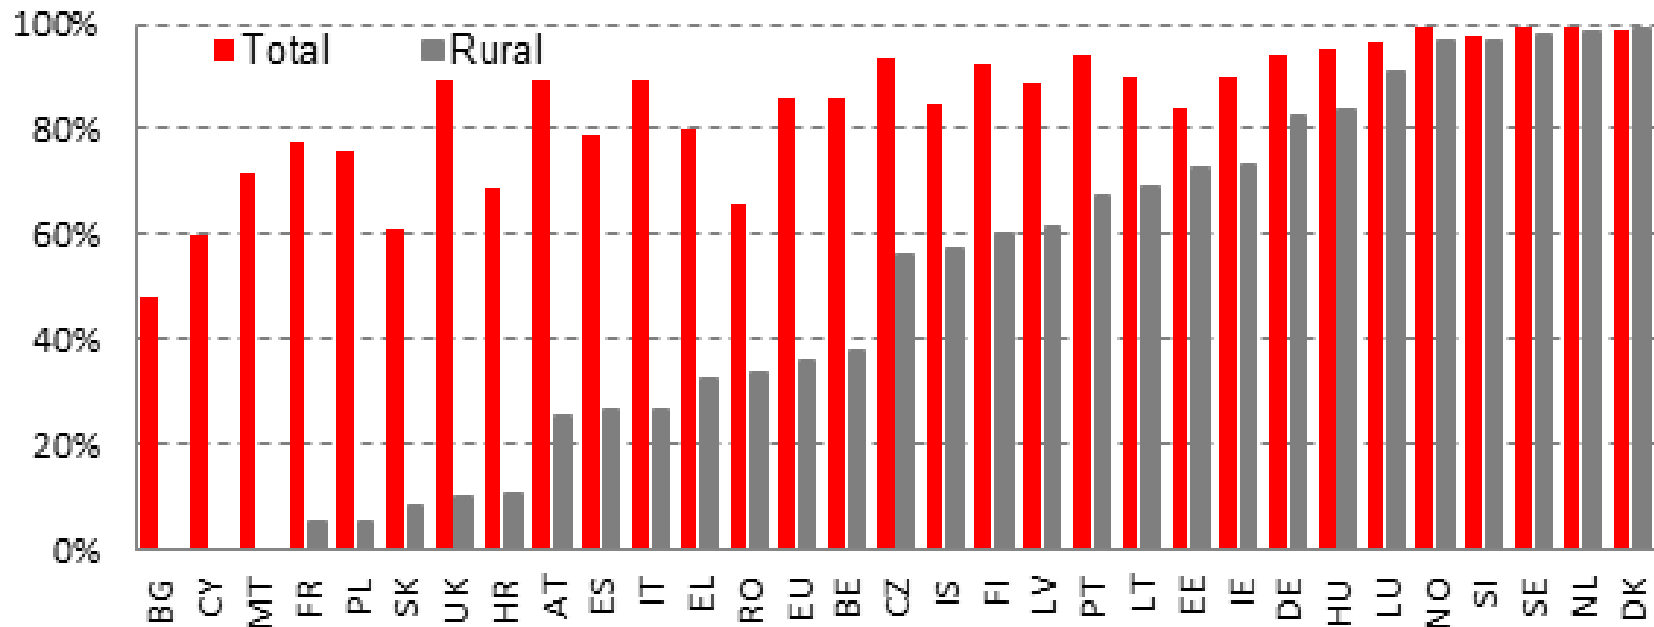

**Increase spectrum use efficiency**

**More consistency in the EU and  
subsidiarity**

## Total and rural 4G (LTE) coverage, June 2015

Source: IHS and VVA

## Adaption of scope

## Modernisation of end-user rights

## Harmonisation

Reinforced  
competences  
for NRA's

New BEREC  
competences

**Thank you for your attention!**
