The object of the tender is the procurement of Ultra-Light Portable Spectrum Monitoring Receivers, antennas and peripheral equipment, as well as the provision of training services to Contracting Authority technicians in the use of equipment and maintenance-and-support services for the warranty period.

The procurement consists of twelve (12) ultra-light portable spectrum monitoring receivers capable to function in 30 MHz to 40 GHz frequency band, along with twelve (12) sets of portable antennas tuned to 30 MHz to 40 GHz frequency band. The receivers should be capable of performing a set of monitoring measurements, with the main one being radiolocation (Line of Bearing – LoB on a GIS tool). The procurement also includes terminal equipment (smartphones or tablet computers) to control the receivers and the corresponding number of licenses of the necessary software. It is

noted that in addition to the aforementioned supply, Contracting Authority technicians' training services (approximately 40 people) on equipment use and maintenance, as well as support services during the Good Maintenance Period should be offered.
