

Information Portal for Antenna Constructions

The Information Portal for Antenna Constructions, keraies.eett.gr, constitutes a user-friendly web application, which allows citizens to find information about licensed antenna constructions at national level or meet the criteria for legal operation (in accordance with [Law 4635/2019](#)).

Developed by EETT, keraies.eett.gr aims at enhancing transparency on matters relating to the licensing of antenna constructions as well as the provision of e-governance services to citizens.
