

Organizational and Operational Adaptation of EETT

European Union
European
Social Fund

"O.P Competitiveness, Entrepreneurship, innovation"
Managing Authority "Digital Transformation" Programme

Co-funded by Greece and the European Union

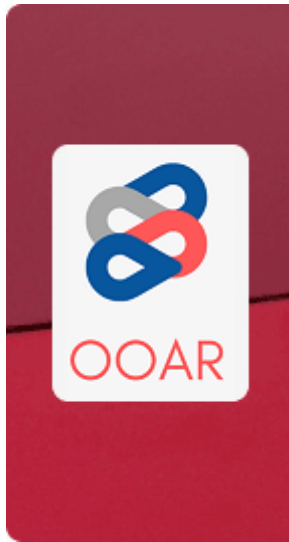

The broad scope of this project ('00AR') is the Organizational Restructuring of EETT. 00AR encompasses, inter alia, the identification, elaboration, adoption and seamless implementation of modern administrative and organizational schemes that are best suited for EETT's internal structure and operation in order to effectively and successfully exercise its statutory responsibilities. EETT seeks to ensure that it can dynamically foresee, and proactively and continuously align its interventions to, the developments in the domestic electronic communications (networks and services) and postal services markets while, in parallel, to appropriately respond/serve the rapidly evolving and ever-increasing demands of businesses and consumers in these markets; thus EETT will continue to assist and facilitate national efforts for the transition to a digital economy and the adoption of modern development paradigms.

The approved budget amounts to € 360,000.00 (three hundred and sixty thousand Euros), including VAT. The project is fully co-financed by national funds and the European Social Fund (ESF) of the European Union.
