

Radio equipment interface requirement 107**Non-specific short-range devices operating in the 5725 – 5875 MHz frequency band**

Normative (1-9)

1	Frequency/Bands	5725–5875 MHz
2	Radio service	
3	Application	Non-specific short-range devices
4	Channelling/modulation	Channel spacing not specified – The entire stated frequency band may be used/any
5	Maximum transmit power level	25 mW e.i.r.p.
6	Channel occupation rules	No restriction on duty cycle
7	Duplex type/separation	Two-way/One-way
8	Licensing regime	Exemption from individual licensing
9	Additional essential requirements	The device may be operated provided that: (1) it cannot cause harmful interference and (2) protection cannot be requested from interference where the device is still subject to interference which causes undesired operations.

Informative (10-13)

10	Frequency planning assumptions	
11	References	EN 300 440
12	Remarks	The function is permitted in implementation of reference E47 of the National Frequency Band Allocation Regulation.
13	Notification number
