

Decision No: 207/3

DECISION

Regulation on the Procedure and Conditions for General Authorizations

The National Telecommunications and Post Commission (EETT)

Having regard to:

1. Article 5, paragraph 6 of the Law 2867/2000 “Organization and Operation of Telecommunications and other Provisions” (Official Gazette 273/A/2000),
2. The fact that the provisions of this Decision do not charge the State Budget with further expenditure,

Decides

The issue of the Regulation for General Authorizations with provisions as below:

Article 1

Object and Definitions

1. The present Regulation regulates the procedure and the conditions for the installation, operation, management and exploitation of telecommunications networks and for the provision of telecommunication Services under the General Authorizations Regime, pursuant to Article 5 of Law 2867/2000.

2. Words or sentences, which are used in the present Regulation, have the meaning of Law 2867/2000 or, in the relevant secondary European Union Law and in the International Regulation of Radio Communications, as it is in force every time.

Article 2

General Authorizations

1. General Authorizations are required to provide any Telecommunications activity, unless no License is required in accordance with Article 5, paragraph 2, of Law 2867/2000, or the issue of an Individual License is required, pursuant to Article 6, of Law 2867/2000.
2. Under Article 5, paragraph 2 of Law 2867/2000 no Authorization or license is required for the importation, trade, manufacture, installation and maintenance of telecommunications terminal equipment, the installation or/and operation of radio communications stations of foreign embassies and diplomatic assignments or/and radio communication stations installed under bilateral intergovernmental agreements as well as for the simple resale of Telecommunications Services.
3. The provider of Simple Resale of Telecommunication Services shall solely notify EETT of its activities on an informal Basis.

Article 3

Procedure

1. An application for a General Authorization is required for the commencement of the provision of telecommunication activities, pursuant to this Regulation and Law 2867/2000.
2. The application for a General Authorization shall be filed with EETT via a Registration Declaration. In the Registration Declaration, the applicant declares its intent to commence one or more telecommunications activities, describes them, as is required in Annex A to this Regulation, and applies for registration in the Telecommunications

Service Registry. The Registration Declaration shall be accompanied by the information, provided in Annex A to this regulation, where a sample of the Registration Declaration is also included.

3. The applicant may initiate the offer of the specified Telecommunications Services as described in the Registration Declaration following the lapse of fifteen (15) days from the complete filing of the Registration Declaration with EETT.
4. The fifteen (15) day period shall begin from the day following the receipt of the Registration Declaration or, in case it is incomplete, from the day following the receipt of the complete application.
5. If EETT determines there is a need for further information about the intended Telecommunication Service, the applicant can be asked to wait up to four (4) weeks from the filing of the application prior to the commencing the provision of the Telecommunications Services, by means of a justified decision, which is issued within the fifteen (15) day period referred above in paragraph 3 of the present Article 3. In this case, the intended Telecommunications Services specified in the Registration Declaration are deemed to fall under the General Authorization following the lapse of a four (4) week period, without prejudice to paragraphs 7 & 8 of this article.
6. EETT shall require further information from the applicant as is described in paragraph 5 above, only if the applicant intends to provide a telecommunications activity which does not belong in any specified category from Annex A to this Regulation or is a novel telecommunications activity or is questioned whether it is subject to a General Authorization or an Individual License or a Simple Resale of Telecommunications Services.
7. If EETT determines on a preliminary basis that the Registration Declaration will be rejected, it issues a statement to the applicant, where the reasons for the preliminary assessment are included either within the fifteen (15) day period according to paragraph 3 of the present article 3, or within the four (4) week period according to paragraph 5 of the same article, inviting the applicant to express its opinion within an appropriate

period. In this case, EETT issues a decision within six (6) weeks from the filing of the relevant Registration Declaration, in accordance with paragraph 4 of Article 5 of Law 2867/2000. In this decision:

- i. Either it confirms that the intended Telecommunications Services are subject to a General Authorization Regime and may commence immediately;
 - ii. Or it allows the provision of the intended Telecommunications Services on the basis of temporary terms;
 - iii. Or it rejects the Registration Declaration and the provision of the intended Telecommunications Service provisionally on the basis of stated reasons, which are communicated to the applicant.
8. If the provision of the Telecommunications Services is allowed on the basis of temporary terms or is provisionally rejected, EETT shall issue a decision setting either the final terms or giving the reasons for final rejection, within one (1) month from this decision.
9. EETT may reject a Registration Declaration for a General Authorization only if the specific Telecommunications Services require an Individual license under Article 6 of Law 2867/2000 or is not legal because of infringement of other provisions of Law 2867/2000, Presidential Decrees, Ministerial Decisions, Regulations or Decisions issued on the basis of Law 2867/2000 or of the general laws for telecommunications activities.
10. The Registration Declaration shall be amended:
- a. In case the applicant declares its intent to modify the specified telecommunications services by filing in a new Registration Declaration, according to Annex A to this Regulation that is subject to provisions of paragraphs 1 to 9 of this article. The Registration Declaration shall be accompanied by the information provided in Annex A to this Regulation, where a sample of the form for the Registration Declaration is included as well.
 - b. In case the applicant declares its intent to interrupt the provision of some of the specified telecommunications services by filing in a new Registration Declaration, pursuant to Annex A to this Regulation. The Registration Declaration shall be accompanied by the information provided in Annex A of this regulation, where a sample of the form of the Registration Declaration is included as well.

- c. In case the applicant declares its intent to modify the administrative information supplied by the telecommunications company, according to Annex A. Any information modification shall be communicated within seven (7) days from its occurrence.

Article 4

Terms and Conditions of General Authorizations

1. EETT may attach terms and conditions about General Authorizations to the list in Annex A during the introduction of new telecommunications services or afterwards, requesting Telecommunications Service providers to:
 - a. Comply with certain conditions regarding the protection of users or subscribers in relation particularly to the prior approval of the standard subscriber contract by EETT, the provision of detailed and accurate information, especially on the quality of provided services and the provision of a procedure for dispute settlement, publication and adequate notice of any change in access conditions, including tariffs, quality and availability of services;
 - b. Make contributions to a universal service fund in accordance with current law;
 - c. Provide customer information necessary for the provision of directory services;
 - d. Provide specific emergency services;
 - e. Make special arrangements for disabled people;
 - f. Comply with specific conditions relating to networks interconnection and service interoperability, in accordance with Article 8 of Law 2867/2000 and obligations under current European Community law;
 - g. Comply with specific conditions, which may be imposed on providers with significant market power.
2. Unless the procedure specified in Paragraphs 7 & 8 of Article 3 above applies, EETT shall give at least one (1) month advance notice of its intent to issue terms and conditions for new or current telecommunications activities under a General Authorizations Regime, via announcements in two (2) daily political and in two (2) daily economical newspapers of pan-Hellenic circulation as well as on its website, inviting affected and

interested parties to express their views on the proposed measures. The terms are enacted within one month from the completion of the consultation.

3. Terms and conditions attached to General Authorizations shall be published on the website of EETT.
4. Terms and conditions for the provision of specific telecommunication activities under a General Authorization Regime may be amended by EETT in objectively justified cases and in a proportionate manner. Forty five (45) days before the relevant decision, EETT shall give notice of its intent to amend terms and conditions to General Authorizations in two (2) political and two (2) financial daily newspapers of pan-hellenic circulation as well as on its website, inviting interested parties to express their views on the proposed measures.

Article 5

Telecommunications Services Registry

1. EETT establishes the Telecommunications Services Registry which consists of records from Registration Declarations, in printed and electronic form. A Registration Declaration inserted in the Telecommunications Services Registry functions as a General Authorization, under the conditions of the present Regulation.
2. The Telecommunications Services Registry shall include the following information:
 - a. Name and address of the provider.
 - b. Legal form of the provider, authorized attorney and legal representative of the provider in Greece.
 - c. Transmission lines and infrastructure use.
 - d. Specification of services.
 - e. Reference Number and date of Registration Declaration.
 - f. Modifications that may occur to the General Authorization of the Telecommunications Service Provider.

Article 6

Compliance

1. Telecommunications Service providers must not exceed or infringe the content of the General Authorizations or terms and conditions attached thereto or other general obligations, which are included in Law 2867/2000, in Presidential Decrees, Regulations or Decisions issued on the basis of Law 2867/2000.
2. In case that a Telecommunications Service provider under a General Authorization Regime does not comply with a term included in the General Authorization, EETT may inform it that it is prohibited to provide specific Telecommunications Services, or/and impose administrative penalties according to current legislature, by way of a reasoned decision. Before imposing such measures, EETT provides an opportunity to the interested Telecommunications Service provider to comply with the terms of the General Authorization within one (1) month from the date of the notification of its decision. At the same time, it gives a chance to the interested provider to express their opinion concerning the application of the above term of the General Authorization. If the telecommunications service provider complies with the terms, EETT issues a justified decision within two (2) months from its initial decision, and proceeds to the rejection or amendment of its decision. In case that the Telecommunications service provider does not comply with the terms, EETT finalizes its justified Decision, within two (2) months from its initial interference, and notifies the interested provider of it within one week from its issue.

Article 7

Termination of Telecommunications activities

1. The Telecommunication Service provider shall notify EETT of the termination of the telecommunications activities, under a General Authorizations Regime, one (1) month before the termination date. In the notification, which shall be made on the form included in the Annex to this Regulation, reference shall be made to the registration number in the

Telecommunications Services Registry. Any fee obligation is met until the date EETT is notified of the termination.

2. In case of termination of the Telecommunications Service Provider, which submitted the Registration Declaration because it merged with another legal entity, the second legal entity is obliged to notify EETT of the termination of provisions of telecommunications activities by the first entity, according to paragraph 1 above. The second legal entity is also obliged to proceed to an amendment of its Registration Declaration in order to provide the additional services that the first legal entity provided or to proceed to a Registration Declaration if it did not provide any telecommunications services until the date of the merger.

Article 8

Validity Period of General Authorization

1. General Authorizations are valid for an indefinite period of time, unless the Registration Declaration filed by the Telecommunications Service provider contains a time limitation, or EETT imposes a limitation. EETT may impose a limitation only in exceptional cases via a justified decision, after an audition of the applicant.
2. Telecommunication activities under General Authorizations is void if:
 - i. A provider of telecommunications services files a notification pursuant to article 7 above that telecommunication activities under a General Authorization is no longer provided, or if
 - ii. The time set for the service provision has expired, or if
 - iii. The provision of Telecommunications Services is prohibited in accordance with Article 6, paragraph 2 of the present Regulation.

Article 9

Fees

All telecommunications undertakings, which operate under a General Authorization are required to pay to EETT an administrative fee of 300 Euros for the first service category and 50 Euros for each additional service category for which a Registration Declaration or an amendment is submitted. This fee is paid each time a Registration Declaration or an amendment is submitted to EETT.

Article 10

Administrative Penalties

In case of a violation of current legislature or terms of the present Regulation, or conditions that arise from telecommunications laws under a General Authorization, EETT may impose administrative penalties pursuant to Article 12 of Law 2867/2000, by way of a reasoned decision and after an audition of the interested party.

Article 11

Transitional Provision

1. Undertakings which already perform telecommunications activities under a General Authorization Regime continue to perform those activities according to the present Regulation. Fees are imposed only for each new added category of telecommunications services.
2. Registration Declarations, which had been submitted before the present Regulation is set in force, are governed by the provisions of the present Regulation.

Article 12

Commencement Validity

The present Regulation enters into force on the date of its publication in the Official Gazette.

Remarks (Note or attach text with you remarks, if any)

Legal binding Statement

- I declare herewith that I **wish to provide** the above marked telecommunications services and to apply for registration in the Telecommunications Services Registry.
- I declare herewith that I **temporarily interrupt** the above marked telecommunications services.
- I declare herewith that all my telecommunications activities **are terminated** and that I cease providing telecommunications services under General Authorization.
- I declare herewith that I **proceed to change** the legal form of my Company. The old form/name is as follows: _____
- I declare herewith that my company has been merged with the company _____ (company's name) _____ (seat) _____ and as a consequence the above legal entity has been terminated as well as the provision of the telecommunications services.

I submit herewith to EETT every legal document of the legal entity or / and all the documents proving that the signatory bounds the represented to the present Registration Declaration.

I declare that I am fully aware of the fact that, regarding any telecommunications activity for which an Individual License is required according to current legislation, such license is not granted through the present procedure and that I am obliged to submit an application for an Individual License before starting the provision of relevant services.

Please note that in case of omission for submission of the Registration Declaration, as well as the delayed or imprecise Registration Declaration, fines may be imposed pursuant to article 12 of the Law 2867/2000.

Explanations

A0101	The telecommunication means-facilities which provide transparent transmission capacity between terminal network points and they do not provide the ability of selective switching (switching operations which the user may control as a part of the leased line provision)	A0411	Procedure for telemetry services in remote sites and results are transmitted via telecommunication networks.
A0201	Leasing part of capacity to the public through network infrastructure which is owned and/or managed wholly or partly by the applicant.	A0501	Broadband transmission of full-motion video, pictures, voices, text and data among videoconference facilities.
A0202	Virtual Private Network Provision (VPN) to the public, through network infrastructure which is owned and/or managed wholly or partly by the applicant. Virtual Private Network (VPN) is the part of the corporate network that provides network services using common switching infrastructure.	A0502	Broadband transmission of sound and television signals within closed user groups (e.g. for training).
A0301	Packet switched transmission of digital information using certain standards like X.25, FPS (Fast Packet Switching) etc.	A0503	Service that combines telephony and television techniques and allows the users to have visual contact during the call.
A0302	Circuit switched transmission of digital information using certain standards like X.21 etc.	A0601	Operation and management of telecommunications networks for closed user groups <u>including voice switching</u> .
A0303	Telex service that allows direct temporary communication between subscribers using a start-stop device and telecommunication circuits of the public telecommunications network.	A0602	Operation and management of telecommunications networks for closed user groups <u>without voice switching</u> .
A0401	Electronic mail service	A0603	Provision of gateways between networks of different providers.
A0402	Transmission of digital information by using EDI standards	A0604	Provision of gateways to networks, e.g. of mail-box service providers, online service providers and internet providers. The services offered in these networks, like e-mail, fax, etc. are included.
A0403	Transmission of information from a data base by fetching from memory (polling) and automated batch transmission (fax distribution services)	A0605	Data transmission for remote control, monitoring, diagnosis and maintenance of telecommunications networks or systems.
A0404	Transmission of transaction data between computers in generic accounting systems and electronic payment systems (e.g. cleaning systems, etc.)	A0606	Network services for which provision of intelligent network features and functions are required (e.g. administering charges to the call party, etc.).
A0405	Data transmission for remote control, monitoring, diagnosis and remote maintenance (not including remote control services of telecommunications networks/systems operation via own switches).	A0607	Provision of international connections through automatic callback.
A0406	Teletex service for text transmission that provides added facilities to that of the telex service and specific typewriting operations and remote text processing.	A0701	Internet Service Provision that does not belong to any other specified category in this declaration.
A0407	Telecommunication service where the intent is to allow transmitted information to be selected and displayed in on a video monitor as text or image.	A0801	Sound and television signal transmission between broadcasting providers via external transmission and distribution lines as well as program exchange lines.
A0408	Telecommunication service for transmission and graphics display at a remote terminal, in its original written or designed form.	A0802	Sound and television signal transmission from the radio or television station to the broadcasting distribution network.
A0409	Service that associates telecommunication and processing data techniques in order to process information remotely.	A0803	Distribution of broadcasting signals via broadcasting distribution networks to the subscribers through cable networks or/and terrestrial repeaters.
A0410	Telecommunication service in which transmitted information is to be recorded in graphical form, upon arrival. Sometimes, transmitted information can be displayed in an alternative form or can be stored for future use.	A0901	Transmission and management of multimedia services via telecommunications networks. Multimedia services include tele shopping, tele teaching, video-on-demand, pay-per-view and similar services.
		A1001	Transmission or/and switching of voice in real time through network infrastructure which is owned and/or managed wholly or partly by the applicant, without number allocation from the National Numbering Plan (including provision of generic telefax services).
		A1002	Voice services that are provided via Internet and without number allocation from the National Numbering Plan.

**HELLENIC REPUBLIC
NATIONAL TELECOMMUNICATIONS
AND POST COMMISSION**

A1101	Provision of voice memory, in which voice mail can be stored or recalled.	C0101	The telecommunication means-facilities, which provide transparent transmission capacity between terminal satellite network points and they do not provide the ability of selective switching (switching operations which the user may control as a part of the leasing line provision).
A1102	Provision of technical infrastructure for the retrieval of information and entertainment programs via a specific access number.	C0201	Unidirectional data transmission as point-to-multipoint connections.
A1103	Videoconference Service in which participants are connected via circuits that support voice transmission. Besides voice, transmission of other signals, e.g facsimile or telewriting, is allowed.	C0202	Broadband transmission of sound and television signals to one or more receiving stations for a selected group of users.
A1201	Provision of public telephones (including provision of general telefax services).	C0203	Video transmission from the site of happening to a television studio via mobile satellite transmitting systems.
A1202	Provision of other telecommunication stations. Describe them.	C0204	Provision of one-way or interactive data transmission paths via satellite facilities at the customer's location.
B0101	Real time transmission or/and switching of voice, via mobile network infrastructure which is owned and/or managed wholly or partly by the applicant, without number allocation from the National Numbering Plan. Call transmission is made through analogue or digital cellular terrestrial radio networks and interconnection points to public fixed networks.	C0205	Broadband transmission of full-motion video, pictures, voices, text and data between videoconference facilities via satellite.
B0102	-Telefax services (either through a fax machine or a computer) and data transmission.	C0301	Transmission of alphanumeric data and information between the central station and the mobile units (vehicles) including location finding.
B0103	Transmission of short messages (up to 160 alphanumeric characters).	C0302	Real-time transmission or/and switching of voice through analogue or /and digital satellite networks.
B0104	Provision of voice memory.	C0303	Transmission or/and switching of data through analogue or /and digital satellite networks.
B0201	Analogue or digital signal transmission, which initiates sound sequences or alphanumeric characters in mobile receivers.	C0401	Transmission of sound and television signals via satellite connections between broadcasting stations.
B0301	Analogue or digital voice and data transmission within a limited user group. Transition to fixed networks is an option.	C0402	Transmission of broadcasting signals from the broadcasting stations to the distribution satellites.
B0401	Packet-switched digital information transmission via virtual connections using certain standards (e.g. X.25) within the mobile data radio networks. Transition to fixed networks is an option.	C0403	Distribution of broadcasting signals for direct satellite receiving by the broadcasting subscribers.
B0501	Voice, data and telefax communication for air passengers to fixed and mobile networks on the basis of terrestrially operated radio stations.
