Presentation title

Minutes of the 25th ISRMM Regulator’s Expert Meeting (5 Sept 2024) held at Doha Qatar

Abstract

The 25th International Space Radio Monitoring Meeting held in Doha in September 2024 brought together experts from 19 administrations and the ITU to discuss advancements and challenges in satellite spectrum monitoring, regulatory frameworks for space activities, interference issues affecting satellite navigation and passive sensing, and strategies for managing unauthorized non-geostationary satellite services, with a focus on international collaboration, technological innovation, and regulatory harmonization.

Short bio

Koshy Abraham works with the Spectrum Monitoring team of the Communications Regulatory Authority Qatar since 2008
