

Name & Organisation

Álvaro Sánchez, CEO at INTEGRASYS

Presentation title

Regulating Satellite Constellations: ITU Compliance

Abstract

With growing satellite constellations, adhering to ITU Articles 21 and 22 is crucial for managing interference and ensuring sustainability. This session will cover power limits, coordination, and the best practices for regulatory compliance.

Short bio

Álvaro Sánchez, CEO of INTEGRASYS and Marquess of Antella, is a Software and Industrial Engineer with a master's in business from ESIC Business School. His expertise spans satellite communications and network management. Under his leadership, INTEGRASYS has pioneered technologies to enhance satellite maneuverability, optimizing operational efficiency and resilience.
